## Making a statement

We are continuously, year-on-year the market leader in the production of prospectuses for listings on AIM and the Main Market of the London Stock Exchange. Companies come to us because they trust our fast, efficient and secure services. Once we have worked with a company through their stock market launch, they know they can trust us to guide them through the challenge of producing their inaugural annual report.

A good number of annual reports have been with us for more than five years with some remaining on our portfolio for 24 plus years!

The combination of our creative input (if required), coupled with our highly attentive client services and production teams serves as a firm basis for us to be both agile and competitive.

We work with clients with a range of requirements, from simple templated designs for tight budgets, to fully designed content driven reports for those with an appetite to create more of a narrative around their results and all those in between.

We provide our services to LSE listed companies at various stages of their corporate journey.

On the following pages we have featured a range of eight reports which represent what we do best for our clients; working closely to help them through the complex reporting process, to produce a beautifully designed report which clearly communicates their key messages to their investor audience.
